# What is Hacktoberfest?

"Hacktoberfest 2019" - [nicholas.cloud/goto/hacktoberfest-2019](https://nicholas.cloud/goto/hacktoberfest-2019)

# What is open source?

*"Open Source software is software that can be freely accessed, used, changed, and shared (in modified or unmodified form) by anyone"*

- Open Source Initiative

# Where do I get started?

Our Hacktoberfest site has a **collection of resources** to help you find projects to contribute to

# Anatomy of a project

You've found a project, what do you do next?

Let's take a look at an **example or two**

# Why choose open source?

- Users can modify and redistribute your programs
- Can be audited, inspected
- Can **accept contributions** from a wider community

# So you found a vulnerability

## What do you do now?

# Blackmail

"Hacktoberfest 2019" - [nicholas.cloud/goto/hacktoberfest-2019](https://nicholas.cloud/goto/hacktoberfest-2019)

Hacktober  
FEST  
2019  
presented by  DigitalOcean and  DEV

# Fix it yourself

"Hacktoberfest 2019" - [nicholas.cloud/goto/hacktoberfest-2019](https://nicholas.cloud/goto/hacktoberfest-2019)

Hacktober  
FEST  
2019

presented by

DigitalOcean

and DEV

# disclose it

Contact maintainers privately

Report to security team at company

# How does disclosure work?

# Is open source software less secure? Well yes, but actually no It's a tradeoff

# A final message

Hacktoberfest is about making **meaningful contributions** that better **the community**.

Be **kind and welcoming**, this is about the **open source community**.

# Ready to get contributing?

Record your participation in the **event repo**!
